

## Scaffolding Training Course | Scaffold Safety Class

Qualified persons and trained personnel are important to scaffold safety. Therefore, evaluating employees' capabilities is an important component of scaffold design, erection, maintenance, and employ, and shouldn't be overlooked in scaffold assessments.

A promotional banner for scaffolding safety training. On the left, a man in a blue polo shirt is speaking. The text reads: "SCAFFOLD SAFETY TRAINING required for any worker erecting and/or using supported scaffolding work platforms. Speak with our qualified Training Expert NOW! 888-926-4727 Toll FREE". In the center, a white box contains the text "REGISTER NOW" in red and blue, and a yellow button with "CLICK HERE" and a hand cursor icon. On the right, there are logos for OSHA and NYC Buildings.

### Scaffolding Training and Erecting/Dismantling

Scaffolds need to be designed by a certified individual, and be constructed and packed relative to that design. Scaffolds need to be erected, dismantled, moved, or altered only within the guidance of scaffold competent individual.

### Scaffolding Safety Training

Scaffolds should be moved, erected, dismantled, or altered only by skilled and properly trained workers who have been chosen to do the job. Workers who definitely are associated with activities just like dismantling, erecting, repairing, and checking scaffolds must be taught to recognize potential risks associated with scaffold activities.

Workers who accomplish work while on a scaffold need to be properly trained by a competent person to understand the potential health risks associated with the form of scaffold being utilized, and to comprehend the types of procedures to manage those potential risks.
